

Ph.D. Student Positions

Department of Computer Science
Missouri University of Science and Technology
MO 65401, USA

The SAINT (Securing Artificial Intelligence and InterNet of Things) Lab of Department of Computer Science at Missouri University of Science and Technology is seeking highly-motivated and capable applicants for the Ph.D. program in computer science. The students will join the SAINT lab and conduct cutting-edge research in the areas of **Internet of Things**, **Machine Learning**, and **Cyber Security**.

Successful applicants will be offered Graduate Research Assistantship (GRA) which includes monthly stipends and tuition coverage.

Qualifications:

- A bachelor or master's degree in computer science/engineering, information science/engineering, electrical/electronic engineering, or a related discipline, from a decent university with a decent GPA;
- Reliable knowledge and experience in IoT or wireless networks, ML or data mining, computer or network security;
- Strong mathematical skills;
- Competency in English and performed well in GRE/TOEFL/IELTS/Duolingo;
- Proficient in at least one modern programming language (e.g., Python, R, C++/C#, Java, MySQL, MATLAB)

How to apply:

Interested candidates should electronically submit their application consisting of:

- 1) curriculum vitae
- 2) academic transcripts
- 3) publications if available
- 4) recommendation letters if available
